

360° computerized teaching

NetOp[®] School

PREPARE. TEACH. EVALUATE.

HOW DO YOU MEASURE AND IMPROVE LEARNING?

How can you make sure that putting a student in front of a PC improves learning efficiency and teaching quality? NetOp School is the user-friendly, efficient, and extremely secure all-round solution for computerized teaching at any level.

Prepare - How do you make sure your teaching and your tests are aligned?

You can prepare lesson plans and tests at home and NetOp School helps you do it, without installing additional software.

Teach - How do you keep your students on track?

In the computerized classroom, how do you keep students on task? NetOp School lets you allow and deny individual applications before or during class. You can lock a student's screen, keyboard and mouse to get full attention whenever you need. You can even broadcast any screen to all, demonstrating applications or guiding internet use.

Evaluate - What is the fastest way of giving your students feedback?

You have prepared a great lesson and taught the students well. Now you have to test them and laboriously grade every student, right? Wrong. NetOp School lets you design and administer tests that grade the students in real-time and help record the lesson. So now, you will know immediately what lessons need repetition.

THE 360° SOLUTION FOR THE 21ST CENTURY COMPUTERIZED CLASSROOM

With NetOp School, you get an all-in-one solution that increases your own efficiency and flexibility while improving the quality of your lessons, increasing control, and keeping every student on task.

BENEFITS FOR THE SCHOOL

The benefits of computerized teaching are well documented. NetOp School brings much more than that to class. Used with a digital whiteboard, NetOp School gives you the functionalities of a projector at just a fraction of the cost. And with extensive reporting functionalities, you can track student progress over an extended period of time.

BENEFITS FOR THE TEACHER

For teachers everywhere, NetOp School opens a world of possibilities. Broadcast any screen to all students. Monitor the work of individual students in real-time. Control student PCs, including keyboard, screen, and mouse. And with "pass the chalk" functionalities and work-group creation, the teacher can enable truly interactive discussions and problem-solving.

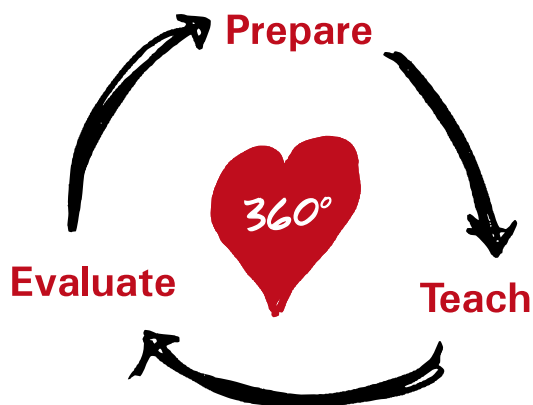

BENEFITS FOR THE STUDENT

Students today are more computer-savvy than ever before, and with NetOp School, they can use their skills in a hands-on environment that lets them go where their studies take them and get personal attention from the teacher when needed. Most of all, NetOp School offers a complete approach to computerized education. Prepare, teach, evaluate, and enjoy 360° computerized teaching.

NETOP SCHOOL IS THE COMPLETE SOFTWARE SOLUTION FOR THE NETWORKED CLASSROOM

NetOp School brings a complete, computerized teaching solution to the networked classroom. Share any screen with the class, follow students as they work and lend a hand where and when it's needed, control which applications can be used, distribute and collect documents from students and create and perform regular tests with immediate individual feedback.

NetOp School lets you prepare for class, teach your students, and evaluate their work in one complete solution.

360° COMPUTERIZED TEACHING

You prepare for class. You teach your students. You grade their work. Get the only teaching software solution that stays with you all the time and makes your job easier.
